TWIN FALLS, Idaho -- The Clover Creek fire was reported to South Central Idaho Interagency Dispatch Center around 5 p.m. on Aug. 4. Three Creek Rural Fire Department, Twin Falls District (TFD) BLM engine crews, along with several aircraft worked to construct containment lines around the fire last night. Dozers were able to complete lines on either side of the fire and are currently reinforcing some areas of the line where the fire is threatening to spread. Crews are facing challenging access as they mop up hot spots in heavy brush. Aircraft along with Three Creek Rural Fire Department resources are no longer on scene.

Clover Creek Fire

- Location: approximately 49 miles west of Twin Falls, near Wintercamp Butte.
- Size: estimated acres 1,100
- Containment: estimated Aug. 5 at noon.
- Control: estimated Aug. 6 at 6 p.m.
- Resources: six TFD engines, one dozer, and one water tender.
- Fuel type: grass and brush
- Fire behavior: creeping and smoldering
- Structures threatened: none
- Cause: lightening
